Bitbucket

2. Verify the installation

```
git --version
```

```
$ git --version
```

3. Configure your Git username and email using the following commands, replacing Emma's name with your own. These details will be associated with any commits that you create:

```
$ git config --global user.name "Emma Paris"
```

Create your first project
Ready to start building? Create a repository for a new idea or bring over an existing repository to keep contributing to it.

Create repository

Import repository

Recent activity

When you take actions across GitHub, we'll provide links to that activity here.

The home for all developers — including you.

Welcome to your personal dashboard, where you can find an introduction to how GitHub works, tools to help you build software, and help merging your first lines of code.

Start writing code

Start a new repository

Collaborate on code with others and track your work in a repository.

Create a new repository

Create your profile README

Create a file in a repository that tells the GitHub community who you are.

Create a README
